Professional Experience

Senior Software Engineer – US Mobile
usmobile.com

December 2019 – Present

- Working on the front-end part of the app which is being used by 200.000 users.
- Taking part in the UX/UI and API design creation processes. Providing code reviews.
- Developed a sub-app with the teammates, which is now generating 25% of the revenue.
- Optimized performance of the app by 3 times.
- Covered the codebase with end-to-end and unit tests which decreased testing time by 10 times. Interviewed people for front-end and QA roles.
- Collaborated with devs outside the company(GCP, duplocloud, stripe, ect.). Mentoring and managing junior devs. Took part in the app migration from cordova to react-native.

Software Engineer – Epam
epam.com

September 2019 – December 2019

- Worked on the user dashboard with lots of charts. Delivering new features in 2 weeks sprint cycle. Technical estimation of work to be performed by self or others.
- Led team of 2 devs. Taking part in developing ideas for solving customer problems in partnership with project managers.

Software Engineer – YLab

October 2018 – September 2019

- Created a front-end for a construction business SPA. Created APIs structure in tandem with back-end developers. Maintained a couple of VMs on Google Cloud Platform.
- Was holding meetings with the customer to collect requirements and demonstrate solutions in a two weeks sprint.

Software Engineer – Softomate

March 2018 – October 2018

- Created a couple of extensions for Chrome, Opera and FireFox. One of the extensions was for similarweb.com. Worked closely with project managers, designers and back-end folks.
- Participating in everyday project meetings in a team of 12 people.

Software Engineer – Cimpleo

May 2017 – March 2018

- Optimized performance of client applications by 2-4 times. Migrated apps to Typescript.
- Created page builder using headless CMS and React which decreased time for creating marketing pages by 7 times. Wrote project documentation and user instructions.
